SAGE

Learning Network

Providing professional development training
for your clinical and non-clinical staff

sagelearning@sagecenters.com

925-574-SAGE ext.304

SAGE now offers RACE approved continuing education courses and professional development trainings for your Veterinary clinical and non-clinical staff.

We Come to You!

We deliver convenient in-clinic trainings. Our lectures, workshops and wet labs can all be done at your facility.

Three Different Types of Trainings!

We offer three different types of trainings that are cost-effective, efficient, and convenient ways to educate employees.

Type 1: Course – This is a one to two-hour presentation or lecture.

Type 2: Workshop – This is a three-hour presentation that includes a participation guide, a practice component as well as subject-related activities.

Type 3: Wet lab – This is a five-hour course specifically designed to teach a technique and requires the use of a wet table.

Let Us Customize Something for You!

All of our trainings are customizable to address your specific needs. Our dedicated trainers will work with you to determine the most appropriate solution to benefit your employees and make the most of their training experience.
